

“” Winery - Environmental Policy

We recognize that every business impacts the environment. “” Winery is taking advantage of the many opportunities available to minimize these impacts. Our product starts in the soil and finds its way to your glass. We want to maintain the character and bounty of the land and bring these attributes to life in the wine we produce.

This policy is meant to serve as a unifying vision of “”s environmental values and guide the actions of our employees and management. This statement outlines our environmental objectives moving forward, and it will be brought to life in our plans and business activities.

Regulatory Compliance

We will comply fully with the letter and spirit of environmental laws and regulations.

Risk Reduction and Resource Management

We will reduce risk and liability by minimizing/eliminating harmful inputs in the vineyard and the using low/no-toxicity “green” cleaning supplies at our facilities. We are conserving and reusing water, maximizing energy efficiency, minimizing our waste stream, and implementing self-sustaining vineyard practices.

We will work with our growers to help them achieve Napa Green Land certification. We are willing to invest in a higher-quality product that maintains the integrity of the land.

We will develop a company-wide system of Environmentally Preferable Purchasing. We will work with vendors to purchase the most environmentally sustainable products available at a reasonable cost.

We measure our energy and water intensity per case/gallon of wine produced and aim for continual improvement in resource use. We have built a “Green Team” to help motivate staff to meet resource reduction goals and provide feedback on our progress over time.

Communication

We will continue to serve as a leader in sharing environmental solutions. We see the interactions in our tasting room and on winery tours as opportunities to help educate not only our customers, but also our employees and distributors about our approach to running a green business. Our hope is that they will take these values home with them.

We will foster customer trust and reliability. We will work to enhance transparency and ensure that the product we produce exceeds expectations at every level.

We welcome feedback and suggestions from our employees, customers and neighbors.

Continuous Improvement

We will annually assess our progress and strive for continual improvement.

We recognize that sustainability is a path not a destination. We are committed to continuing education and constantly improving our environmental performance
